

# Lipocine Announces Update on Jury Trial in Patent Infringement Lawsuit Against Clarus Therapeutics

SALT LAKE CITY, Dec. 29, 2020 /PRNewswire/ -- Lipocine Inc. (NASDAQ: LPCN), a clinical-stage biopharmaceutical company focused on metabolic and endocrine disorders, today announced that Judge William C. Bryson of the United States District Court of Delaware has postponed the February 8, 2021 jury trial scheduled to hear arguments in the patent litigation case of *Lipocine Inc. vs. Clarus Therapeutics Inc.* due to the ongoing effects of the COVID-19 pandemic. The jury trial will be rescheduled once it becomes clear when jury trials will resume in the District of Delaware.

In the pending suit against Clarus Therapeutics, Inc. ("Clarus") Lipocine is alleging that Clarus's JATENZO® product infringes Lipocine's U.S. patents: 9,034,858; 9,205,057; 9,480,690; and 9,757,390.

## About Lipocine

Lipocine Inc. is a clinical-stage biopharmaceutical company focused on metabolic and endocrine disorders using its proprietary drug delivery technologies. Lipocine's clinical development pipeline includes: TLANDO, LPCN 1144, TLANDO XR, LPCN 1148 and LPCN 1107. TLANDO, a novel oral prodrug of testosterone containing testosterone undecanoate, has received tentative approval from the FDA for conditions associated with a deficiency of endogenous testosterone, also known as hypogonadism, in adult males. LPCN 1144, an oral product of bioidentical testosterone, recently completed a proof-of-concept clinical study demonstrating the potential utility in the treatment of non-cirrhotic NASH. LPCN 1144 is currently being studied in a Phase 2 clinical study. TLANDO XR, a novel oral prodrug of testosterone, originated and is being developed by Lipocine as a next-generation oral testosterone product with potential for once-daily dosing. In a phase 2 clinical evaluation when administered as once daily or twice daily TLANDO XR met the typical primary and secondary end points. LPCN 1148 is an oral prodrug of bioidentical testosterone targeted for the treatment of cirrhosis. LPCN 1107 is potentially the first oral hydroxyprogesterone caproate product candidate indicated for the prevention of recurrent preterm birth and has been granted orphan drug designation by the FDA.
