1. Title: Oral LPCN 1144 treatment significantly reduced liver fat and key liver injury markers in biopsy confirmed NASH subjects: Results of a Phase 2 randomized controlled study Low Testosterone in Males may Warrant Liver Health Assessment Intervention

Session Type: Poster Session

Category: NAFLD: Therapy

Date: June 23, 2021 8:00 a.m. E.T. to 6:00 p.m.C.E.T

ePoster Session: June 25, 2021 11:30 a.m. C.E.T.

2. Title: High prevalence of low normal or overtly hypogonadal levels of testosterone observed in histologically established NASH subjects in LiFT Study

Session Type: Poster Session

Category: NAFLD: Therapy

Date: June 23, 2021 8:00 a.m. E.T. to 6:00 p.m.C.E.T

3. Title: LPCN 1144 improves body composition in biopsy-confirmed NASH patients

Session Type: Poster Session

Category: Late Breaker: General Hepatology

Date: June 23, 2021 8:00 a.m. E.T. to 6:00 p.m.C.E.T

About Lipocine

Lipocine Inc. is a clinical-stage biopharmaceutical company focused on metabolic and endocrine disorders using its proprietary drug delivery technologies. Lipocine's clinical development pipeline includes: TLANDO, LPCN 1144, TLANDO XR, LPCN 1148, LPCN 1154 and LPCN 1107. TLANDO, a novel oral prodrug of testosterone containing testosterone undecanoate, has received tentative approval from the FDA for conditions associated with a deficiency of endogenous testosterone, also known as hypogonadism, in adult males. LPCN 1144, an oral prodrug of bioidentical testosterone, recently completed a proof-of-concept clinical study demonstrating the potential utility in the treatment of non-cirrhotic NASH. LPCN 1144 is currently being studied in a Phase 2 clinical study. TLANDO XR, a novel oral prodrug of testosterone, originated and is being developed by Lipocine as a next-generation oral testosterone product with potential for once-daily dosing. In a phase 2 clinical evaluation when administered as once daily or twice daily TLANDO XR met the typical primary and secondary end points. LPCN 1148 is an oral prodrug of bioidentical testosterone targeted for the treatment of cirrhosis. LPCN 1154 is an oral neurosteroid targeted for the treatment of depressive disorders. LPCN 1107 is potentially the first oral hydroxyprogesterone caproate product candidate indicated for the prevention of recurrent preterm birth and has been granted orphan drug designation by the FDA.
